

## DIGITAL ENGAGEMENT

- | Touchscreens
- | Digital Signs
- | Sensor Based Interactives

## COMPELLING EXPERIENCES

A touch screen kiosk or digital sign can fill your lobby, exhibit or presentation space with compelling content on an affordable budget. Motion graphics are more engaging than static, plus you can change them as often as you like.

CreateDev

### Personalized support

Anyone can hang technology on a wall or ceiling, but will it consistently delivery fresh content? How often must you print signage, to change information day to day? We can provide one of a kind, interactive content which is refreshed on a regular basis. Keep your content colorful and compelling.

Don't worry about software or hardware failure. We test for stability on every project, plus our optional hardware, software and content support will help you take advantage of this investment for years to come.

### Results

With the promise of ever-changing content and consistent uptime, engage your clients to repeatedly visit and see what is coming next.

We can take this experience one step further by adding sensors to detect passersby. Encourage interaction with levers, wheels, gestures and buttons which dynamically effect content on screens. Draw crowds, inform, entertain and gather data all the while.
